

# Dominik Dold, Dr. rer. nat.

🏠 born in Titisee-Neustadt, Germany

✉ dodo.science@web.de

🌐 <https://dodo47.github.io/>

🎓 brain-inspired computing, neuroscience, machine & deep learning, AI

## Work experience

- 2020 – . . . . . 📌 **Research scientist.** Siemens AI lab, Munich.
- 2016 – 2020 📌 **Research assistant.** Petrovici group for neuro-inspired AI, Heidelberg University.
- 2017 – 2018 📌 **Guest researcher.** Senn group for computational neuroscience, University of Bern.
- 2014 – 2015 📌 **Research assistant.** Evers group for theoretical quantum dynamics, MPIK Heidelberg.

## Additional training and experience

- June 2020 📌 **AI@Sustainability 72h Hackathon** organized by the Siemens AI lab.
  - August 2019 📌 **Team communication – key roles and intercultural contexts workshop.**<sup>†</sup>
  - June 2019 📌 **DS<sup>3</sup> data science summer school.**  
Five-day school co-organized by the École polytechnique & the DATAIA Institute.
  - March 2019 📌 **IRCN course in neuro-inspired computation.**  
Four-day course offered by the University of Tokyo.
  - 📌 **University leadership and management (Epigeum).**<sup>†</sup>
  - February 2019 📌 **Business management course "Grundlagenwissen BWL".**<sup>†</sup>
  - October 2018 📌 **Computational physics with GPUs.**<sup>†</sup>
  - April 2017 📌 **Machine learning in science and industry.**<sup>†</sup>
- <sup>†</sup> Courses offered by the Heidelberg graduate academy and graduate school for physics.

## General skills

- Languages 📌 very good writing, reading and communication skills in english
- Coding 📌 PYTHON, TensorFlow, PyTorch, Mathematica, Matlab, C(++), HTML
- Software 📌 familiar with Linux bash shell and Windows systems, version control (git), integrated testing (jenkins), job scheduler (slurm, moab), SPARQL, AWS
- Design 📌 L<sup>A</sup>T<sub>E</sub>X, Microsoft Office, Microsoft Powerpoint, Inkscape, TikZ, Gimp
- Teaching 📌 co-supervised one master's thesis and supervised lecture tutorials, physics experiments for students and soft skill courses for first-year students
- Social 📌 organized the Journal Club of my research group during my Ph.D. & gave martial arts lectures during my school time

## Communication skills

### Selected talks

- 2019 📌 **Invited talk at Huawei research center**, Hangzhou, China.  
Invited by Liao Jianxing & Dr. Yansong Chua.
- 📌 **Selected talk at the Cosyne conference 2019**, Lisbon, Portugal.  
Selected from submitted abstracts.

## Communication skills (continued)

- 2018 ■ **Invited talk at the ETH Institute of Neuroinformatics**, Zurich, Switzerland.  
Invited by Dr. João Sacramento.
- **Intel Neuromorphic Research Community (INRC) workshop**, Reykjavik, Iceland.  
Invited by Mike Davies as INRC project representative.
- **Neuroplasticity: From Bench to Machine Learning**, Guildford, England.  
Selected from abstracts. Workshop at the Institute of Advanced Studies, University of Surrey.
- **From Neuroscience to Machine Learning**, Paris, France.  
Invited to workshop at the European Institute for Theoretical Neuroscience.

### Poster presentations

- 2019 ■ **Bernstein conference 2019** in Berlin, Germany.
- **CNS conference 2019** in Barcelona, Spain.
- **DS<sup>3</sup> data science summer school** in Paris, France.
- **IRCIN course in neuro-inspired computation** in Tokyo, Japan.
- 2018 ■ **Bernstein conference 2018** in Berlin, Germany.
- **EMBO dendrites workshop 2018** in Heraklion, Greece.
- 2017 ■ **Bernstein conference 2017** in Göttingen, Germany.
- **CNS conference 2017** in Antwerp, Belgium.

## Awards

- 2019 ■ **First prize in the finals of the 2019 International Collegiate Competition for Brain-Inspired Computing (ICBC 2019)** at Tsinghua University in Beijing, China.

## Education

- 2016 – 2020 ■ **Dr. rer. nat.**, Heidelberg University, Germany.  
Thesis title: *Harnessing function from form: towards bio-inspired AI in neuronal substrates*.
- 2014 – 2016 ■ **M.Sc. in Physics**, Heidelberg University, Germany.  
Thesis title: *Stochastic Computation in Spiking Neural Networks Without Noise*.
- 2010 – 2014 ■ **B.Sc. in Physics**, Heidelberg University, Germany.  
Thesis title: *Energy Conservation in Fano Spectral Line Shape Control*.
- 2001 – 2010 ■ **Abitur**, Gymnasium am Romäusring, Villingen-Schwenningen.

## Publications

### Patent applications

- 2021 ■ **D. Dold & J. Soler Garrido**. Industrial device and method for building and/or processing a knowledge graph. *21152148.9, 18 Jan 2021*.
- **D. Dold & J. Soler Garrido**. Neuromorphic hardware for processing a knowledge graph represented by observed triple statements and method for training a learning component. *21152139.8, 18 Jan 2021*.
- **D. Dold & J. Soler Garrido**. Neuromorphic hardware and method for storing and/or processing a knowledge graph. *21152142.2, 18 Jan 2021*.

## Publications (continued)

### Journal articles & preprints

- subm.    ■ **D. Dold** & J. Soler Garrido. SpikeE: spike-based embeddings for multi-relational graph data.
- in prep.    ■ W. Senn & **D. Dold** et al. Lagrangian dynamics of dendritic microcircuits enables real-time error backpropagation across cortical areas.
- 2020    ■ J. Göltz & L. Kriener et al. Fast and deep: energy-efficient neuromorphic learning with first-spike times. *arXiv:1912.11443v3*.
- S. Billaudelle ... **D. Dold** et al. Versatile emulation of spiking neural networks on an accelerated neuromorphic substrate. *IEEE International Symposium on Circuits and Systems*.
- 2019    ■ A. Kungl et al. Accelerated physical emulation of bayesian inference in spiking neural networks. *Frontiers in Neuroscience*, 13, 1201.
- **D. Dold**, I. Bytschok & M. Petrovici et al. Stochasticity from function – why the bayesian brain may need no noise. *Neural Networks*, 119, 200–213.
- 2017    ■ I. Bytschok, **D. Dold** & M. Petrovici et al. Spike-based probabilistic inference with correlated noise. *arXiv:1707.01746*.

### Supervised theses

- 2018    ■ M. Zenk. Spatio-temporal predictions with spiking neural networks. *Master's thesis, Heidelberg University*.

### Research proposals

- 2019    ■ J. Jordan, L. Kriener, **D. Dold**, M. Petrovici & W. Senn. Real-time error-backpropagation for deep cortical microcircuits in spiking neuromorphic systems. *Intel INRC grant (cont.)*.
- 2018    ■ J. Jordan, **D. Dold**, M. Petrovici & W. Senn. Real-time error-backpropagation for deep cortical microcircuits in spiking neuromorphic systems. *Intel INRC grant*.
